1. The picture taken by the running command is completely black, and no picture is seen?
Answer: There is a dust cover on the HQ camera, you need to remove the dust cover when taking pictures. Since the camera is sensitive to dust, please cover the dust cover when not taking pictures.

2. The pictures taken are blurry or unclear?
Answer: The HQ camera needs to focus first before taking pictures, otherwise the picture taken is not clear, you can turn the focus ring to adjust the focus of the camera.

3. Does it support python program control?
Answer: Yes, we can install the python library of the camera, then, import the library in python and use it.

4. Can the camera take picture or video at night?
Answer: The camera does not have night vision function, you can add fill light by yourself.
